

Samsung Outdoor Signage

OHN, OHN-D Series

Deliver bright, creative messages on robust outdoor signage

Samsung's new outdoor signage, OHN series, has elevated the typical outdoor advertising experience with its bold and engaging content delivery at any bus stop or street billboard. The OHN series presents enhanced detail and true-to-life graphics in all conditions, from the most powerful sunlight to the darkest of nights, 24/7. The OHN is durable and resistant to multiple outside elements that could affect a display's performance. Also included is easy-to-use management software that allows users to control the display with ease. Samsung's OHN series will make any business stand out from the crowd with its immersive and high-quality images, attracting consumers to its brand.

Highlights

- 85" large-sized digital displays optimized for outdoor usage
- Excellent visibility under direct sunlight through 3,000 nit high brightness
- Optimal durability with IK10-rated Magic Protection Glass and IP56-rated displays
- Advanced content management via MagicINFO S6 Player powered by TIZEN

Industry trend

The DOOH (Digital Out Of Home) industry is growing at such a rapid pace due to its ability to reach and target consumers on the go. The traditional media tactics businesses previously used, such as static signs, are no longer effective in providing a meaningful visual experience. Instead, more businesses are turning to digital signage as a means of advertisement. As the technical advances in digital signage have taken over, roads and bus stops are now seeking enhanced experiences for consumer engagement. Digital signage is also an efficient medium of promoting products and services with immersive screens and dynamic images. There is a desire to have flexibility and connectivity to the displays through sophisticated content management software. With the industry thriving and companies turning to digital displays, this is the present and the future.

Why Samsung OHN series?

Samsung's OHN series displays were designed for excellent visibility and dependability for outdoor use at bus stops and roadsides. With a high-brightness 3,000nit screen and a built-in dimming sensor, content can be clearly presented, day or night. The OHN series can endure extensive outdoor impact with the Magic Protection Glass and is weatherproof through IP56-rated protection. Combined with a built-in media player, users can manage the display and the content efficiently without needing additional equipment. In addition, the OHN-D series has a double-sided screen and allows users to open the display effortlessly for repair and upkeep with easy access design.

High visibility

Easy content management

High durability

Easy maintenance

Key features

Unsurpassable visibility day and night

The OHN series allows for exceptional, consistent content delivery with 3,000nit brightness and 24/7 performance. With a built-in dimming sensor, the display automatically adjusts the brightness based on the external lighting environment, saving display operating expenses and power consumption.

Easy-to-use management software

The embedded MagicINFO Player S6, backed by the powerful TIZEN operating system, boosts the display's overall performance, allows for painless content management and ensures seamless transition and playback.

Built strong to endure any damage

The OHN series provides advanced safety through tempered Magic Protection Glass. It features durability that is IK10-rated, further proving its robust level of strength that can endure physical impact.

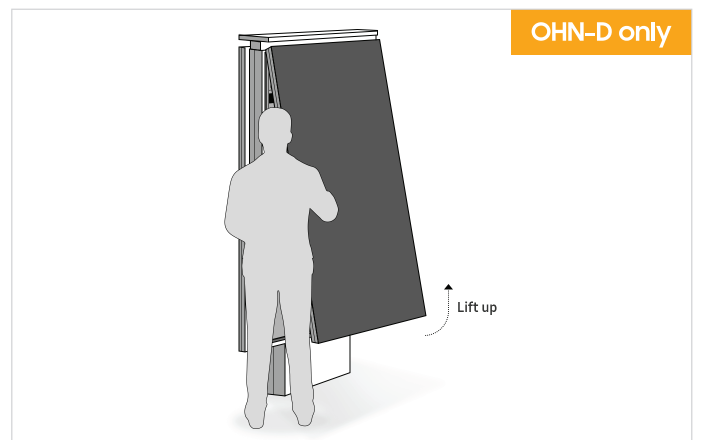

Resistant to outdoor elements

The OHN series is verified to perform in any outdoor setting. IP56-rated protection ensures the OHN series will withstand physical impact as well as dust, humidity or other outdoor elements that could affect the display.

A double-sided screen with slim depth

The OHN-D series has two screens to highlight brilliant content and graphics on each side. With 3,000nit brightness on both sides of the display, users can double their marketing in one location with vibrant content. Its slim design is ideal for a bus shelter or street billboards.

Easy setup and maintenance

Users can easily access the inside of the OHN-D series for repair or maintenance. Simply lift the set for quick entrance to the display's inner components for any necessary updates.

Specifications
