

## Galaxy AI

Enter a new era of mobile AI today with the new Galaxy S25 series and Galaxy AI. Complete your daily tasks easily with the voice assistant and chat naturally with Gemini Live to create new ideas or efficiently perform tasks as they arise. As Galaxy AI features are integrated with various apps, many manual tasks can be completed in different apps with a single conversation. Enhanced camera, image and video processing functions add the necessary finishing touches to your shots.

**Now Brief - your update for the day**

With Now Brief, receive personal updates for your day - from the weather forecast or your energy score in the morning to a summary of your day with photos in the evening. The new Now Bar on your lock screen gives you direct access to your Now Brief notifications, music, timer and much more, without having to unlock your smartphone.

**Cross-platform Galaxy AI**

Are you looking for a nearby Italian restaurant where you can eat dinner with your friends and also take your dog along? No problem! Chat with Gemini and you will not only receive a list of recommended restaurants - you can also forward the restaurant info to your friends at the same time. But that's not all: thanks to Galaxy AI, you can also enter the event in your calendar simultaneously. All without having to open a series of different apps only by a simple voice command.

**Intelligent camera system**

With the intelligent camera system of the Galaxy S25 series, you can edit your photos professionally or filter out disturbing background noises from your videos, such as wind. Capture more highlights and shadows in your videos by taking them with the Log Video feature - without the need for additional equipment. You can then edit them using expert tools like color grading, without any loss in quality.
