Installation

To secure a power cable in place, using C14 Smart-Lock Plug Connector, do the following:

Note: The unit used in the illustrations below is a C14 EZ-Lok Plug Connector, the procedure for connecting the 2X-EA13 and 2X-EA14 is identical.

1. Slide and attach the Smart-Lock Plug Connector onto a C14 plug until it clicks into place.

2. Insert the plug, with the Smart-Lock Plug Connector attached, into any available socket on a PDU by sliding it directly over and straight into the socket.

3. To disconnect the plug from the PDU, grip onto and squeeze the Smart-Lock Plug Connector as you pull and detach the plug from the PDU socket.
