Accessories

LQZ.RGB_Set | LQZ.ARGB_Set Remote | LQZ.ARGB_Set Cable

With the Xilence Cooling Control Set, the colors of RGB or ARGB running computer components can be controlled. Xilence and PC components not manufactured by Xilence can be controlled and the colors can be set as desired.

The colors are set using a remote controller or a mini cable controller.

The RGB variant is compatible with all 12V-R-G-B- 4PIN connections. The ARGB variants are suitable for all 5V D/P 3PIN connections.
